Product designer and hands-on builder with 10+ years connecting customer experience, internal systems, front-end implementation, experimentation, and design leadership. I find meaningful friction, design the experience, build or lead the solution, measure what changes, and improve it with the people who use it.

SELECTED IMPACT

~35 hrs/wk TEEBOX Estimated time saved from brief through final approval	+16.20% CLUB FINDER Desktop add-to-cart conversion	-33.9% PRE-OWNED Bounce rate after homepage launch	40+ LEADERSHIP Experiments scaled annually across four brands
---	---	---	--

EXPERIENCE

Interactive Design Manager

Callaway Brands | Austin, TX

Feb 2024 - Present

- Lead a multidisciplinary team of four across front-end experimentation, email development, UX/UI design, and graphic design while remaining hands-on in product strategy, prototyping, and implementation.
- Designed and built **Teebox**, a multi-brand email production platform used for 100% of marketing emails. It supports about 14 emails per week, saves a validated minimum of four hours per Callaway Golf email, and reduced file size by 40%.
- Consolidated five workflow tools into one Supabase-backed platform with dual ESP support. Completed MCP connectors in August 2026 as the foundation for AI-assisted email workflows; direct ESP API connections remain in progress.
- Led the Callaway Pre-Owned homepage redesign from research and content strategy through UI, partial front-end implementation, launch, and measurement. Results included 33.9% lower bounce, 28.2% lower exit, and 9.98% more time spent.
- Built systems beyond the customer surface: Campaign Builder for coordinated asset delivery, Marketing Planner for self-service visibility, and Business Trend Monitor alerts relied on by approximately 20-25 people.

Interactive Design Lead

Callaway Brands | Austin, TX

Apr 2021 - Feb 2024

- Connected design, development, merchandising, and marketing across four brands. Scaled experimentation to more than 40 tests per year and built reusable patterns that improved delivery and consistency.
- Led customer research and redesigned Club Finder, then built the live A/B test used for validation. The experience increased desktop add-to-cart conversion by 16.20%, order conversion by 7.69%, and category-selector engagement by 70.33%.
- Grew the design team from one to four and created onboarding, documentation, standards, and clearer ownership so specialists could work independently without losing shared quality.

CAREER PROGRESSION

Front-End Web Developer

Callaway Brands | Austin, TX

Jun 2019 - Apr 2021

- Built and maintained ecommerce pages, reusable interfaces, and interactive shopping tools with a focus on responsive behavior, accessibility, performance, and brand consistency.
- Used design experience to bridge intent and implementation, improving QA and helping teams ship interfaces that matched the intended customer experience.

SELECTED PRODUCT WORK

Teebox

INTERNAL PRODUCT + AI WORKFLOWS Owned the product from an initial visual editor through a multi-brand production system. Defined the UX, architecture decisions, quality checks, rollout, and adoption while using AI to accelerate implementation and debugging.

Campaign Builder

CREATIVE OPERATIONS Turned multi-channel campaign production into a reusable workflow: create faster, approve faster, deliver cleaner. Current usage includes OGIO and Callaway Pre-Owned designers, with broader rollout underway and an estimated 75% production-time reduction.

Caddy

CONSUMER AI UX Owned UI, UX recommendations, interaction direction, product presentation, and ongoing iteration around conversational product recommendations. Focused on helping customers understand and act on AI output without claiming ownership of the underlying model.

Trade-In / Trade-Up

LONG-TERM PRODUCT EVOLUTION Evolved a slow, reload-heavy trade flow into a clearer visual experience, then continued the work through Trade-In / Trade-Up and Pay by Grade.

EARLIER EXPERIENCE

Interactive Designer

Callaway Golf Interactive | Austin, TX

Mar 2018 - Jun 2019

- Designed and developed responsive email and promotional experiences, improved reusable production patterns, and addressed accessibility, mobile, and dark-mode issues across campaigns.

Design, ecommerce, and production roles

Eloquent Inc. | FASTSIGNS | Independent ecommerce

2013 - 2018

- Progressed from production design into UI leadership, client communication, ecommerce experimentation, and small-business operations. Built firsthand understanding of how creative decisions affect delivery, customers, and revenue.

CAPABILITIES

PRODUCT DESIGN	UX/UI design, information architecture, customer flows, prototyping, design systems, accessibility, ecommerce, conversion optimization
BUILD + SYSTEMS	Internal products, workflow tools, dashboards, HTML/CSS, JavaScript, front-end prototypes, Supabase, reusable components, QA systems
AI + AUTOMATION	AI-assisted development, MCP workflows, automation, translation workflows, reporting, debugging, API integration planning
LEADERSHIP	Multidisciplinary team leadership, product strategy, roadmap input, mentoring, change management, cross-functional facilitation; bilingual English and Spanish
TOOLS	Figma, Adobe Creative Suite, Dynamic Yield, Contentstack, Salesforce Commerce Cloud, Oracle Responsys, Email on Acid, Git/GitHub, VS Code

EDUCATION + CREDENTIALS

Baymard Institute - UX Master Certificate, in progress | Web Development Bootcamp - Udemy | Design and Web Certifications - Raritan Valley Community College
